A Frontier Lady: Recollections Of The Gold Rush And Early California

Synopsis

Since it was first published in 1932, *A Frontier Lady* has held a high and special place in the literature of America's westward migration. Written in the 1880s at the request of her son, the philosopher and educator Josiah Royce, Sarah Royce's narrative of the family odyssey across the continent and of their early years in California is also the portrait of a remarkable woman. In the words of her daughter-in-law, "Wherever she was, she made civilization, even when it seemed that she had little indeed from which to make it."

Book Information

Customer Reviews

I selected this book from a list given in my college English class. The list of books were all nonfiction so I knew it would be a book based on fact. I knew nothing more. As I read, I could not put this book down. The story takes place beginning in Iowa the year 1849. "Gold fever" was born. The Royce family was on the move from their home to the great golden state of California. Sarah has more passion, faith, and drive than I've ever seen in a book. She is an example indeed of strength and inner peace throughout many challenges in a small amount of time. I was so grateful to see this book is still in print! It was first published in 1932 never meant to be a book at all. It was Sarah's gift to her son. She wrote about her journey using her journal she kept as they traveled. I will buy this book not only for my children, but for gifts as well. By the way, Sarah and her family end up living here, in the Sierra Foothills, and that is where I live! I've never read a story about the Gold Rush or the 49er's. I always thought it would be too depressing. There are sad times in this book, but as you read you can't help but believe with Sarah that they will beat all the odds.

Sarah with husband and daughter, Mary, move to California in 1849. Trusting the God of the Bible, the Royces experience life (and almost death) on the trail to California. Second to the last party to complete the trip into northern California before winter, they eventually settle in Grass Valley. Her son, Josiah Royce, becomes the famous Harvard historian and philosopher with new ideas (Royce Hall of UCLA), but his mother, Sarah, retains her faith in the God of the Bible. First hand look at San Francisco and northern California in the 1850's. Sarah is my great-great grandmother and Mary, the little girl in the story, is my great-grandmother. Easy reading and great book to take on a plane. We buy and give these books to many guests at our company ...they are very popular.

This little gem of a book should be on the shelves at every library. Aside from the likable Sarah, the wonderful social history is very absorbing for those interested in women's lives during the 1850's. Even if you are not particularly interested in the Gold Rush, you will be interested in the experiences of one of our formers. Buy this as a gift for your daughters. Joy Melcher, Civil War Lady Magazine

As a historian and author of the book: SOUTHERN CALIFORNIA MISCELLANY, I rate this book with 5 stars for its excellent overview and in-depth look at the true lives of women who came to California during the Gold Rush. This is not a book filled with the fanciful notions of a romantic's point of view. No, this is a gut-wrenching look at the realities of pioneering California and the women who tamed the wild land and the wild men!
