Customer Reviews

Yes it is a map... But as this map is meant for tourist why don't they have any attractions listed? Ave of Boababs, Coral Reefs, Lemur Parks ect. With all the blue ocean area there should be inserts

Be aware that the scale given for this map is obviously wrong (false). Madagascar measures about 1550 Km from north to south - and only 85 cm (or 35 inches) on the paper. There's no way the scale is 1:800,000 as stated. 1:1,800,800 would be more accurate. But appart from this small detail, the map itself is very good.Sergio, from Brazil

This map was helpful for planning where to go and where to stay along the way. But it really wasn't necessary because you are required to hire a driver unless you have an international drivers license. Beside thes drivers know how to get everywhere and where is best to stay along the way.

It isn't easy to find a decent current map of Madagascar, particularly one showing road systems. This map is a bit big, but that allows more detail. Will be very useful for traveling in Mada.
